### News From the East.

State Campaign Chairman J. C. Cantrill and National Committeeman W. B. Haldeman were called by wire to New York last week to confer with National Chairman Vance C. McCormick, Senator James and others in regard to the campaign for the re-election of Wilson and Marshall. They were given information that Democrats all over the country are united in support of the administration and that the indications are that the Democratic nominees will be given a vote of confidence that will re-elect them with a tremendous majority, as the voters are convinced that the President pursued the right course in the European and Mexican situations and that his administration has accomplished more real good for the country than any in fifty years. Chairman Cantrill says that the national leaders are not only not disappointed over the result in Maine, but cheered with it as the Democratic party has gained an advantage there never before shown in the national election year, the normal Republican majority having been cut from 33,000 to 13,000. They would not be surprised, therefore, if Wilson carries the State in November together with other New England States. The Republicans claim that Wilson and his policies have been rebuked in the rock-ribbed Republican state does not comport with the figures. Chairman Cantrill also found that Eastern leaders of the Progressive party in 1912 together with Republicans with Progressive tendencies will vote for Wilson because his policies please them better than the old guard ideas of Card and Hughes.

The outlook everywhere appears bright, but it should not make the Democrats too confident. A scared fight is generally the best fight while the too cock-sure often lose. Kentucky Democrats must be on their mettle and remain on guard until six o'clock on the evening of November 7th. Eternal vigilance, like the price of liberty, is the price of success at the polls.

### GOLD HYPODERMIC NEEDLES.

It has become necessary to lower the cost of hypodermic needles, so they are now being made of gold. The reduction is said to be quite satisfactory, although gold as a cheap substitute is filling a new role; for the platinum needles long used are much more expensive.—Literary Digest.
